

## PETER A. FILLAT III, AIA, LEED AP PRINCIPAL

In 1992 Mr. Fillat formed his own studio in order to intimately explore design. In doing so Mr. Fillat created a practice focused on creatively approaching problems in order to find unique and innovative solutions. Under his sole direction the practice focuses on architecture, interior design, urban design, and sustainable practices. Mr. Fillat is committed to creating lasting works of architecture and designing in harmony with the environment. He is dedicated to engaging communities and individuals with works based in permanence that delight the people they serve, are respectful of the environment, and create unity between form, function, and spirit.
