Focusing on site specific responses to programmatic challenges Mr. Lowe's work emphasizes the influence of the surrounding physical, cultural, and human landscape on built environments. His commitment to research, investigation, and the collaborative process make for thoughtful solutions that acknowledge a project's complexity while creating a simple, effective response to the problem. Mr. Lowe's commitment to sustainability is evidenced by his LEED Accreditation as well as his thoughtful decisions during design processes that steer all projects toward sustainable building and management principles.
