FILLAT+
ARCHITECTURE

Mr. Roycroft's approach to architecture and design is based in the creation of concept-based clean and simple designs that embrace clients' desires to produce functional and habitable spaces. His research and analysis of spatial relationships allow compelling design solutions to reveal themselves in well detailed, finely tuned spaces. Mr. Roycroft is focused on the creation of innovative and interesting spaces; as such he is highly invested in new and innovative concepts, research, and materials in architecture and its related fields.
